Ado (ădʊ), *sb.*, properly *v inf.* = **at do**, which was the fuller form . [In Norse *at* is the prep used with the inf = Eng *to*; see A- *pref* 5 Hence in northern Eng, as still used in north Lanc. and Westm. 'a bit o' summat at eat' *Ado* is thus a northern dialect form for *to do*, which has in certain phrases, and as a sb , passed into general use]

1. *pres. inf.* To do; in northern writers in all constructions; in others only after *have*, in phrase *to have ado*. (Cf. Fr. *avoir affaire*, orig. *avoir à faire* to have a-do, or to do.)

?1280 *Kembie's Cod. Dipl.* II. 186 Na man sal have at do. 1375 BARBOUR *Bruce* X 349, I mycht nocht suffice thar to, Sa mekill sald be thare ado. *c* 1400 *Rom. 2. In doing, being done; at work, astir.

1377 FLEETWOOD in Ellis *Orig. Lett.* II. 202 III. 56 Upon Thursday there was nothing adoo but preaching of Sermondes. 1608 EARLE *Microcosm* XXVII. 58 Only an eager bustling, that rather keeps adoo than does anything. 1834–46 J ROW (father) *Hist Kirk* (1843) 291 The tryell of presbyteries is the principall thing that is ado at this tyme. 1837 RUTHERFORD *Lett* 97 (1862) I 248 The remembrance raised a great tempest & (if I may speak so) made the devil ado in my soul. 1658 J NEWTON in *Phil. ¶ Hence through such phrases as *much ado, little ado, more ado*, by taking the adverbs as adjs qualifying *ado* the latter was viewed as a sb , and so construed in *a great ado, any ado*, etc The transition may be seen in the following quotations, in the first of which *ado* is still the inf , in the second the sb , in the third it may be either.

Æ (usually written as a digraph or ligature, but also, and in the earliest times, separately ae) was in OE the symbol of a simple vowel, intermediate between *a* and *e* When short, as in *gief fadu* it represented orig Teut short *a*, and had the power of modern Eng *a* in *man*, *glad*, when long, as in *sæ*, *flæsc*, the same sound prolonged, as in a common American pronunciation of *fear*, *hair*, *there* After 1100 the short *a* was generally replaced by *a* (though sometimes by *e*), the long *æ* continued to be written *æ* in the 12th and early 13th *c*, the OE *ea* passing into the same sound and symbol, but in the development of ME this symbol died out, and was replaced by simple *e* or *ee* Thus OE *sæ*, *flæsc*, *cæs*, *cældst* are in Ormin and Layamon *sæ*, *flæssh*, *æs*, *ældst*, but afterwards *see*, *flesh*, *ees*, *eeldst* The symbol *æ*, which thus disappeared from the language in 13th *c* was re-introduced in 16th *c* in forms derived from Latin words with *æ*, and (this being the Latin symbolization of Greek αι) Greek words in αι, as *ædisfy*, *æther* But this *æ* had only an etymological value, and whenever a word became thoroughly English, the *æ* or *ae* was changed into simple *e* as *edsfy*, *ether* The *æ* or *ae* now remains, only (1) in Greek and Lat proper names as in *Æneas*, *Cæsar*, even these, when familiar, often take *e* as *Judea*, *Etna* (2) In words belonging to Roman or Gr Antiquities as *ædile*, *ægis* (3) In scientific or technical terms as *ætiology*, *nastication*, *phanerogamous*, *Athenæum*, these also when they become popularized take *e*, as *phenomenon*, *Lyceum*, *museum*, *era*

A initial is thus to be looked upon as an earlier spelling of *E*, and will here occur only (1) in LE words that became obsolete, before changing to *e*, as *æ* law (OI *ā*), *æ* river (OI *ēa*), (2) in words directly adopted or formed from Latin and Greek which became obsolete before changing to *e* as *ædituate*, or have not changed to *e* because they indicate ancient things as *ædile*, *ægis*, or are technical as *æ·rolops*, *æ·rotaint ætiology* All other words will be found under their later form in E

In many modern books the digraph *æ* is regularly resolved as *ae*, when this is done, dissyllabic *æ* ought to be printed *aë* thus either *ægis aerial*, or *aegis aërial*, but simple *ae* is often used in both

As to pronunciation usage differs The analogy of the language, the practice of orthoepists and the alternate spelling with *e*, are in favour of *æ* being treated precisely like *e* in the same position But there is a strong tendency with classical scholars (at variance with their practice as to other long L and Gr vowels) to make it long (*ē*) in all positions. This influences popular usage to some extent, so long as *æ* is written, as soon as *e* takes its place, natural English habits prevail Cf *antisept*, *antiseptic*

Æsthete (e·sθīt, ī·sθīt) [ad Gr *αἰσθητής* one who perceives, cf. *athlete*] One who professes a special appreciation of what is beautiful, and endeavours to carry his ideas of beauty into practical manifestation

1881 BURNAND in *Daily News* 31 Jan 2/3 The matter of fact, silly humorous, but quiet æsthete colonel, who descends like a bomb shell in the midst of the æsthetes 1881 *Spectator* 2 July 859 The sham æsthete never chooses pretty colours

Æsthetic (esθe·tik see below), *a* and *sb*, also **esthetic** [mod ad Gr *αἰσθητικ-ός*, of or pertaining to *αἰσθητά*, things perceptible by the senses, things material (as opposed to *νοητά* things thinkable or immaterial), also 'perceptive, sharp in the senses', f vb stem *αἰσθε-* 'feel, apprehend by the senses' Applied in Germ by Baumgarten (1750–58, *Æsthetica*) to 'criticism of taste' considered as a science or philosophy, against which, as a misuse of the word found in German only, protest was made by Kant (1781, *Crit R. V.* 21), who applied the name, in accordance with the ancient distinction of *αἰσθητά* and *νοητά*, to 'the science which treats of the conditions of sensuous perception,' a sense retained in the Kantian philosophy, and found in English *c*1800 But Baumgarten's use of *æsthetic* found popular acceptance, and appeared in Eng after 1830, though its adoption was long opposed (See below) Recent extravagances in the adoption of a sentimental archaism as the ideal of beauty have still further removed *æsthetic* and its derivatives from their etymological and purely philosophical meaning The pronunciations esθe·tik, *ī*sθe·tik, esθī·tik, *ī*sθī·tik, are all in use, the second is at present most common in London]

¶ The following quotations illustrate the history of the word

1832 *Penny Cycl* I 256 Æsthetics (*Æsthetik*) is the designation given by German writers to a branch of philosophical inquiry, the object of which is a philosophical theory of the beautiful. 1832 *Philol Museum* 369 Beautiful and ugly depend on principles of taste, which it would be very convenient to designate by an adjective Some English writers have adopted the term *esthetical* This has not however yet become an established English word Perception in general is something very different from that peculiar and complex modification of it which takes cognizance of the beauties of poetry and art. *Esthetics* would naturally designate the doctrine of perception in general, and might be wanted as a technical term for that purpose. By the Kantian school, indeed, esthetic is used to denote that branch of metaphysics which contains the laws of perception . As an additional reason for hesitating before we adopt *esthetic*, it may be noticed that even in Germany it is not yet established beyond contest. 1842 GWILT *Encycl Architect* 693 There has lately grown into use in the arts a silly pedantic term under the name of Æsthetics it is however one of the metaphysical and useless additions to nomenclature in the arts in which the German writers abound 1859 SIR W HAMILTON *Lect. Metaph* I vii 144 It is nearly a century since Baumgarten . first applied the term Æsthetic to the doctrine which we vaguely and periphrastically denominate the Philosophy of Taste, the theory of the Fine Arts, the Science of the Beautiful, etc.,—and this term is now in general acceptation, not only in Germany, but throughout the other countries of Europe. The term Apolaustic would have been a more appropriate designation.

In certain words, before *g* sounded (dʒ), the original *ad* has been preferred, as *ad genticulate*, *ad generate*, before *gn a* is found, as *a gnate* (also *ad nate*), *a gnize*, *a-gnomen* (also *a l nomen*)

a 1677 Fairfax *Short Mem.* (1699) 116 The Army was almost wholly infected with this Humour of Agitation. *Ibid.* 105 I shall now descend to some particulars of their Agitations.

8 The keeping of a political or other object constantly before public attention, by appeals, discussion, etc., public excitement. See Agitate 8.

1828 *Ann. Reg., Hist.* 122/2 His [Catholic Association's] orators publicly proclaimed that 'Agitation, as they termed it was the object which they had in view, and that agitation they would have so long as they found it necessary. 1865 W. Phillips *Speeches* III. 53 The antislavery agitation. 1879 McCarthy *Own Times* I. 337 With the Manchester school began a new kind of popular agitation. Up to that time agitation meant appeal to passion. The Manchester school introduced the agitation which appealed to reason and argument only, which stirred men's hearts with figures of arithmetic, rather than figures of speech.

Agitational (ædʒĭtē·ʃənăl), *a rare* [f. prec. + -al.] Of or pertaining to agitation, connected with the promotion of discussion on public questions.

1866 *Morn. Star* 14 Feb., The denunciations, which have been published are all of them so purely political, so purely agitational—if we may coin a word.

Agitative (æ·dʒĭtĕtĭv), *a.* † *Obs.* [f. L *agitāt-* (see Agitate *a*.) + -ive, as if ad. L. **agitātīvus*.] Tending to agitate, stir, or move, motive, excitative.

1687 H. More *App. to Antid.* (1712) 221 If a Spirit use his Agitative power moderately. 1753 Chambers *Cycl. Suppl.* s.v., The agitative force of the pendulum arises from three things.

‖ Agitato (ædʒĭtā·tō), *a. Mus.* [It. <L *agitātus* see Agitate *a*.] 'Agitated', used in music to describe the mode or character of a movement, hence, adverbially, 'in an agitated manner, with agitation, restlessly'.

Agitator (æ·dʒĭtēter) [a. L *agitātor*, n. of agent, f. *agita-re* see Agitate *a* and -or.] One who agitates. Specially —

†1 *Eng. Hist.* An agent, one who acts for others (see Agitate *v.* 5), a name given to the agents or delegates of the private soldiers in the Parliamentary Army 1647–9, in which use it varied with Adjutator. *Obs.*

(Careful investigation satisfies me that *Agitator* was the actual title and *Adjutator* originally only a bad spelling of soldiers familiar with *Adjutants* and the *Adjutors* of 1642. *Adjutator* has naturally seemed more plausible to recent writers unfamiliar with this old sense of 'agitate,' and the functions of the Agitators of 1647. J. A. H. M.)

1647 (June 4) *Two Lett. of Sir J. Fairfax to both Houses of Parlt.* with the Advice of the Council of Warre also the Petition of the private Souldierie of the Army presented by their severall Adjutators. [*Signed*] Edward Saxby, Edward Taylor, Adjutators of the Generals Regiments of Horse, etc., etc. 1647 (June 5) *Solemn Engagement of the Army.* [Official paper printed under auth. of Gen. Fairfax.] Upon a late Petition to the General from the Agitators in behalf of the soldiery. 1647 (June 11) in Rushw. *Coll.* (1721) VI. xv. 556 The Agitators on the behalf of the Soldiers presented to have the Question put. [So always in Rushw.] 1647 Evelyn *Mem.* (1857) III. 6 The agitators are for certain reconciled with the army. 1650 Fuller *Pisgah Sight* II. xii. 250 Devills then dancing for joy where once Angels (those holy Agitators) went up and down betwixt heaven and earth. *c* 1650 Sir T. Herbert *Mem.* 11 Active and malevolent persons of the army, disguised under the specious name of agitators, being two selected out of every regiment to meet and debate the concerns of the army. *a* 1671 Fairfax *Short Mem.* (1699) 209 Now the Officers of the Army were placed and displaced at the will of the new Agitators. [So always in F.] *a* 1674 Clarendon *Hist. Reb.* III. x. 33 The common soldiers made choice of three or four of each Regiment, most Corporals or Serjeants, few or none above the degree of an Ensign, who were called Agitators, and were to be as a House of Commons to the Officers of the Army. [So always in Cl.] 1827 Hallam *Const. Hist.* (1876) II. x. 210 Those elective tribunes called Agitators, who had been established in every regiment to superintend the interests of the army. (*Note to Agitators.* Some have supposed it to be a corruption of *adjutators*, as if the modern *adjutant* meant the same thing. But I find it always so spelled in the pamphlets of the time.)

2 Littré makes them two words identifying *air* (1100 f with OFr *aire* 'area, open place, AERIE q v (which was occasionally masc.) through the chain of ideas 'nest stock, family family character, derived manner, comparing phrases like *fancon de bon aire*, hawk of a good sort (stock aeria but no *formal* connexion can be traced between OFr *aire* and mod Fr *air*, while OFr *aire* never had the sense of 'external appearance, which is moreover quite a late sense of mod Fr *air* (end of 16th c). Diez, after Burguy inclines to identify the two senses, through the ideas of 'air, breath, spirit, character, manner, comparing the range of L. *spiritus*, originally 'breath, air' 2 It seems probable that the sense of 'manner was adopted in Fr from It in which it is of old standing (see Florio above). Diez says that the Fr *de bon aire* (*de bon airer*) was adopted in It and *aere* treated as the Latin *aere*, *aere*, *aria*, whence *di buon aria*, hence it is not impossible that the development of senses supposed by Littré, may have taken place in It and thence been transferred in 16th c to Fr *air* 3 But it is more probable that there was no confusion with *aire*—aerie, and that the idea of *manner*—*external* manner, appearance, men,' rather than 'innate character —is a simple extension of the idea of the 'enveloping or affecting atmosphere special to a place, or situation' as when one is said to carry with him the 'air of the office (Fr *air du bureau*), or to catch 'the air of the court,' Shaks. (see below, cf La Bruyere 'L air de cour est contagieux, il se prend à Versailles, comme l accent normand à Rouen') which I utter himself refers to 'atmosphere, and which is not separable from 'an air of gentility, of truth,' etc This would also best accord with Br IV undoubtedly of It. origination, *aere*, *aria*, (see Florio above), here translating L. *modus* 'manner, also 'musical mode, metre, measure, melody]

[The difficulty as to *a-cambok* a *cam bow*, is that no forms of the word show *cam* from which the earliest are the most remote. The Icel *keng boginn* comes nearer the form but there is no evidence that it had the special sense of *a kimbo*, and none that the latter ever had the general sense of 'crooked. Al- *pref*² The Arabic article *the*, retained as an essential part of the word in various words of Arabic origin adopted in Eng as *alcohol, alcove, alcoran, alkali, a alkali, almagest, almanac*, etc

-al *suffix*, of adjs and sbs I *adj* 1 repr L *-al* em (*alis, -ale* stem *ali*) adj suff = 'of the kind of, pertaining to, varying in some words with *-in* em, the form always used when *l* preceded, thus *tal, qual, natal, oral, alar, stellar, regular, lineal* and *lineär-* In words that survived, *-alem* became in OFr and hence in early Eng *el*, as *mortalem, mortel* But to some extent in Fr and entirely in Eng this was afterwards refashioned after L, as *al*, on the analogy of which I adjs in *-alis* and Fr in *el* have since been englished without limit 2 The number of these adjs in *alis* has been immensely increased in med and mod L and in the mod Rom langs and L this has become a suffix addable to any L sb as seen in *agmin al has al, cordi al, document al, marin al, nation al, pred al, circumstanti al, constitution al denomination al, longitudin al proportion al, providenti al, prudenti-al, antipesti lenti-al* none of which are found in ancient L Following L precedent (as in *boreal em, hebdomadal em theatr al em*) *al* is also suffixed to Gr sbs, as in *baptism al, cathedr-al, coloss al, chor al, octagon al, pastor ach al* 3 In L, secondary adjs in *alem* were formed on other adjs, esp when these were used substantively, as in *æqu um æqual-em, annu um annual-em, diurn um diurnal em infern um infernal em, vern um, vernal em* This process has been greatly extended in the mod langs, esp in F where *al* (like *ous* is a living formative, freely applied to L adjs in *eus, ius, uus, rnus, -is*, and other endings, to give them a more distinctively adj form thus, *aer e al corpor e al funer e-al, senator i al, continu-al, individu al, perpetu al eternal, patern al, celestial, terrestri al magnific al* This is extended to Gr adjs in *-ικος -ειος* which also frequently gave substantives (*musice tactices rhomboid*), so that as adj suffixes *acal, ical, oidal* occur earlier in E than the simple *ac ic, oid* when the two coexist, as in *comic al tragic al historic al* that in *-ic* etc means of or belonging to the thing that in *-ical* relating to dealing with, indirectly or remotely connected with the thing as a *historic* answer a *historical* treatise a *comic* paper, a *comical* idea See AC C CID Other suffixes are also added as in *cent al ly -t-e, -tzation, formal ity*
II *sb* 4 Adjs in *-al* in various genders and numbers were used substantively in L, thus *rival is, annal es animal, tribunal, spousali-a, Baccanali-a* Many of these have been adopted in E, directly or through Fr, as *rival, annals, animal, Bacchanals, penetralia, Saturnalia*, and the number has been increased by the mod sb use of many which were only adj, or did not exist in L, as *cardinal, principal, moral, oval, signal, regimentals, canonicals* 5 Nouns in *alia* (neut pl) which survived into OFr became *aille* (fem sing) with pl *ailles*, adopted in ME, as *aylle, -aille*, later *-ayle, -al*, as L *sponsali-a*, OFr *espousaille s*, E *spousaille, spousaile s*, L **battália* OFr *bataille*, Eng *bataille, -aile, -ail, now battle* On this analogy, *-aille, -ail, al* became an Anglo Fr and E formative of nouns of action on vbs of Fr or L origin, as in AFr *arrivaille* arrival, so of later formation (some quite modern) 'revival, survival, approval, removal, avowal, renewal, acquittal, committal, transmittal, refusal, recital requital, dismissal, perusal, refusal, carousal, rehearsal, reversal, revisal, reprisal, surprisal, dis-, inter, pro-, re-, sup-, trans-posal, trial, denial, decrial', occas also on native final accented vbs as 'bestowal, betrothal, beheadal' *Bridal* and *burial* simulate this ending, but have a different origin, yet they have probably aided the prevalence of these nouns of action in *-al* in mod Eng

The *aldor* (or *ealdor*) was thus a natural rank the *aldor man* its political equivalent But the distinction necessarily faded away the Northumbrian and Mercian Gospel glosses constantly have *aldorman* for the WSax *ealdor* and in WSax itself *ealdorman* differed from *ealdor* solely in its more restricted and technical use

1 A senior signor, superior, ruler, a noble or person of high rank

In OE the special title of one exercising authority under the king over a former kingdom as Mercia, a district or county a viceroy or local lieutenant Used also to translate Lat *princeps, subregulus optimas satrapa dux comes praepositus* and in a more general sense many other words as *pontifex, architriclinus, presbyter senator* etc The special title was mostly supplanted by *eorl* under the Danish dynasty the more general sense continued for several centuries and gave rise to 2 and 3 For the OE title recent historical writers have used the late West Saxon and Kentish *ealdorman* but the general OE form was *aldormann*

E All in *comb*

Combinations with *all* as first element have existed from the earliest times, and have become, since *c* 1600, unlimited in number In some groups the combination is merely syntactic, though even there individual instances of long standing have become true compounds, of the gradation in *all alive, all important, all powerful, almighty* The stress is not on *all* except in a few real compounds as *a leags, a lso* On these combinations as well as on simple phrases, *derivatives* are freely formed in which the loose union or non union of the original elements is cemented by the formative process, so that *all* is no longer merely in syntactic combination with the rest of the word, thus *all pervadingness, all eyed* cannot be analysed as *all + pervadingness, all + eyed,* but only as (*all-pervading*) + *-ness,* (*all eyed*) + *-ed* The following general classification contains I Simple combinations, II Derivatives formed on these, and on phrases Words in SMALL CAPITALS are treated in their alphabetical place in the sequel

I Simple combinations

(*Note* As to the origin and history of the word *almanac* —

1 The earliest notices are 1267 Roger Bacon *Op may* xv (1733) 130 Antiqui astronomi ponunt principium anni circiter principium Octobris, sicut patet in expositione tabularum, quae Almanac vocantur, *Op Tert* xl. (1859) 36 'His tabulae vocantur *Almanach* vel Talligum, in quibus homo posset inspicere omnia ea quae in caelo sunt omni die, sicut nos in

calendario inspicimus omnia festa sanctorum . *c*1345 Gio vanni Villani *Cronaca* XI xli, ' Secondo l'almanacco di Profazio Giudeo, e delle tavole Toletane dovea essere la detta congiunzione di Saturno e di Giove a dì 20 del detto mese di Marzo [where the 'Tables of Toledo (constructed *c* 1080 by Arzachel) again point to the Arabs in Spain]. Explanations have been offered of *manākh* from Semitic sources, as Arab *manay* to define, determine, *manā* measure, time, fate, Heb *manāh* to allot, assign, count, Arab *manaḥa* to present, *minḥat* a gift, all of which fail in form or sense or both

2. Eusebius *De Præp Evangel* III 4, quotes Porphyrius as to the Egyptian belief in astrology, in horoscopes, and so called lords of the ascendant, ' whose names are given in the *almenschiaka* (*ἐν τοῖς ἀλμενιχιακοῖς*), with their various powers to cure diseases, their risings and settings, and their presages of things future Notwithstanding the suggestive sound and use of this word (of which however the real form is very uncertain), the difficulties of connecting it historically either with the Spanish Arabic *manākh*, or with med I *almanach* without Arabic intermediation, seem insurmount able. Nor does the sense readily point to such tables as those described by Roger Bacon, Chaucer, and Regiomontanus

3. *Manākh* has been identified with a L *manaca* or *manachus*, applied in Vitruv IX 8 (Dialling) to a circle in a sun dial showing the months or signs of the zodiac an origin which would well explain Pedro's word in both senses but the true reading of Vitruvius's word is now generally agreed to be *mēnæ* (Gr *μῆνες* monthly), and it has not yet been shown that the reading *manacus* was ever so generally known or accepted, as to make its adoption probable at the hands of any Arab astronomer in Spain Nor has it been shown to be impossible Of many other conjectures none are worthy of notice]
